COSC 120 – Lab #4
Control Your Destiny.

Purpose: Use if statements to do a variety of simple tasks.

Tasks:

1.) Go to Blackboard and download lab4.java from the course documents folder. Save it to your Desktop.

2.) Open BlueJ and start a new Project called Lab4. Make sure that if you are working on the lab computers that you are creating this project on your Desktop.

3.) Once created, add the class from lab4.java by going to Edit -> Add Class from File.

4.) Fill in the two empty methods based on the description noted in the comments. You will also need to fill in code elsewhere. Read the comments to find out where.

5.) After the methods are complete, compile and create a Lab4 object then run both methods.

6.) Show your output to your TA.

Things needed: If statements, Scanner, println.
