

COSC 120 – Lab #2

First few steps.

Purpose: Use BlueJ to create your first set of code for this class.

Tasks:

- 1.) Go to the course website and download lab2.java from the link next to the link for this lab. Save it to your Desktop.
- 2.) Open BlueJ and start a new Project called Add3Numbers. Make sure that if you are working on the lab computers that you are creating this project on your Desktop.
- 3.) Once created, add the class from lab2.java by going to Edit -> Add Class from File.
- 4.) Fill in the two empty methods based on the description noted in the comments.
- 5.) After the methods are complete, compile and create a Lab2 object then run both methods.
- 6.) Show your output to your TA.
