

COSC 120 – Lab #3

Control Your Destiny.

Purpose: Use if statements to do a variety of simple tasks.

Tasks:

- 1.) Go to the course website and download lab3.java from the link next to the link for this lab. Save it to your Desktop.
- 2.) Open BlueJ and start a new Project called Lab3. Make sure that if you are working on the lab computers that you are creating this project on your Desktop.
- 3.) Once created, add the class from lab3.java by going to Edit -> Add Class from File.
- 4.) Fill in the two empty methods based on the description noted in the comments. You will also need to fill in code elsewhere. Read the comments to find out where.
- 5.) After the methods are complete, compile and create a Lab3 object then run both methods.
- 6.) Show your output to your TA.

Things needed: If statements, Scanner, println.
