

COSC 201 – Lab #3

Stretch

Purpose: revise code found in your book to implement some wildcards.

Tasks:

- 1.) Open Eclipse and start a new Java Project called StretchyLab.
- 2.) Using the shape parent class, stretchable interface and code examples from p. 127-135 in your book, revise the strchAll method to accept an ArrayList rather than an array.
- 3.) Be sure to use wildcards to ensure that both ArrayList<Strechable> and ArrayList<Rectangle> are acceptable parameterized types.
- 4.) Write a driver class that tests your code.
- 5.) Turn in your code via the Digital Dropbox in Blackboard by start of class Monday.
