

COSC 338 – Lab 5

The “Alan doesn’t know what to do so he made something up” lab

Purpose: Use various primitives to come up with something creative.

Task: Leaning on your (possible) creative side, I’d like you to create a 3 dimensional model of something. It can be as complex as you’d like but it must contain at least 10 total 3 dimensional objects (specified in GLUT) and have at least 5 different types and must include the Utah Teapot.

You are allowed to work in groups (of up to 2) for this lab.

DUE: Tuesday, March 4th before the start of class.

Deliverables: Any source code you create.
