COSC 251 – Lab #1
C is for Cookie

Purpose: You've been thrown in the deep end and you don't know how to swim.

Task: Utilizing either of the Visual C++ environments on the Windows based machines (or your environment of choice) create a simple program that will act as a very bothersome calculator. It should compute the square of a number inputted, the square root of a number inputted, the factorial of a number inputted or the log of a number inputted.

You should utilize a separate function to print out the menu.

Deliverable: the c file that contains your source. It should be well commented.

Due: 11:59pm Monday. No exceptions. To be turned in via Digital Dropbox.
