COSC 251 – Lab #8
Running Against Nature in LISP

Purpose: Using LISP to iterate.

Task: Using either the do-while loop or the loop macro, create a function in LISP to take in an integer n and return the nth Fibonacci number. You may not use recursion and you may not create helper functions for this lab.

Deliverable: the lisp code that you create. It must be submitted via Blackboard

This lab may be worked on in pairs.

Due: By 11:59pm Monday. To be turned in via Blackboard.
